

## Help, my link is broken!

Do you have a link from the old version of our system that has stopped working? Don't worry-- here's how to find the new link to your book or journal.

From the [Library homepage](#), find the search box in the center. Click the link next to it that says Advanced Search. You'll see a page that looks like this:

The screenshot shows the library search interface. At the top, there is a navigation bar with the logo "QJ LIBRARIES" and several menu items: "NEW SEARCH", "DATABASES A-Z", "JOURNAL SEARCH", and "BROWSE SEARCH". There are also icons for a refresh button, a notification bell, and a "Guest" user indicator. Below the navigation bar, there is a search area with three radio buttons: "Everything" (selected), "Articles", and "Course Reserves". To the right of these buttons is a "SIMPLE SEARCH" link. The main search area contains a search form with two rows of search criteria. The first row has a dropdown menu for "Any field", a dropdown for "contains", and a text input field. To the right of this row are two more dropdown menus: "Material Type" (set to "All items") and "Language" (set to "Any language"). The second row has a dropdown for "AND", a dropdown for "Any field", a dropdown for "contains", and a text input field. Below the second row is a link that says "+ ADD A NEW LINE". To the right of the second row are two date selection fields: "Start Date:" and "End Date:", each with dropdowns for "Day", "Month", and "Year".

Take a look at the first line in the block of search options. The space to the left where it says "any field" is a drop-down menu. Select "Title" from the list and type in the title of your book or journal. In the options on the right where it says "Material Type", select what you're looking for from the list. If you have other information you want to include in your search, add it underneath where you listed the title-- in this example, we included the author of the book we're searching for. Here's an example:

LIBRARIES NEW SEARCH DATABASES A-Z JOURNAL SEARCH BROWSE SEARCH Guest

Search for:  Everything  Articles  Course Reserves SIMPLE SEARCH

Title contains to kill a mockingbird

Material Type Books

AND Author/Creator contains lee

Language Any language

Start Date: Day Month Year

End Date: Day Month Year

+ ADD A NEW LINE CLEAR

→ Title contains to kill a mockingbird AND Author/Creator contains lee SEARCH

Here's another example, with a journal instead of a book:

LIBRARIES NEW SEARCH DATABASES A-Z JOURNAL SEARCH BROWSE SEARCH Guest

Search for:  Everything  Articles  Course Reserves SIMPLE SEARCH

Title contains international journal of biomedical science

Material Type Journals

AND Any field contains

Language Any language

Start Date: Day Month Year

End Date: Day Month Year

+ ADD A NEW LINE CLEAR

→ Title contains international journal of biomedical science SEARCH

When you're ready, click the Search button to get a list of results. Each record lists the title, author, and whether your item is available at Kresge. If we have multiple versions of something, it will tell you that too-- selecting a "multiple versions" listing will show you the copies we have:

Here you will find all kinds of information about the book or journal. One of the options near the top will help you fix your broken link-- the Permalink button.

Click the button! The page will display the permalink and give you the option to copy it to your clipboard. This is the link you can use to replace your broken one.

Need more help? Contact the [Research Help Desk](#).
